SUMMARY

Information Technology graduate with hands-on, full-stack development experience across paid freelance client work, an internship, and team-led academic projects spanning web, mobile, and game platforms. Comfortable owning a project end-to-end, from requirements through deployment, and quick to adapt across different tech stacks.

EDUCATION

STI College Balagtas — BS Information Technology
Bulacan, Philippines

Graduated Jun 2026

EXPERIENCE

Freelance Developer — Self-Employed (Remote)

Jan 2023 – Present

- Manual warehouse tracking was slowing operations at DRIM Refrigeration Equipment Corp.; engaged to digitize it, I architected a role-based inventory system for stock, material requests, and field fulfillment, now used daily by a 10-person team and live at drim-inventory-system.vercel.app.
- A fellow student needed an AR-based learning tool for their Grade 7 Science thesis; I engineered a Vuforia/Unity AR pipeline with a React/Firebase companion app, delivering 24 interactive 3D models across 3 quarters.
- Two more students needed freelance-built systems for their theses; I delivered a cafe ordering system (Android, React, Socket.IO, MongoDB) and Heri-Threads on the TALL stack (Laravel, Livewire, Alpine.js), both shipped on time.
- Another student needed a disaster-preparedness game for their capstone requirement; I built Disaster Ranger, a 2D Godot game with 4 emergency-response scenarios.

Frontend Developer Intern — Bulacan State University

Feb 2025 – May 2025

Malolos, Bulacan | 486 hours

- University departments ran core workflows entirely on paper; I built the React UI components for the Document Tracking, Record Management, and Vehicle Trip Ticket systems, and integrated REST APIs with backend developers for reliable data flow.

ACADEMIC PROJECTS

Case No. Zero: A Philippine Legal Crime Narrative

Dec 2025

Capstone | Team Lead & Lead Developer

Godot, GDScript

- Our capstone required a narrative-driven crime game simulating real legal procedure; as team lead and lead developer, I built all 3 core systems: investigation, dialogue, and courtroom, delivering a roughly 1-hour playthrough playtested with our capstone panel.

Library Attendance & Circulation Monitoring System

Jun 2025

Team Lead

HTML, CSS, JavaScript, PHP, PostgreSQL, Android Studio

- Our department relied on manual attendance and circulation logs; leading a 4-person team, I delivered a web and mobile system with dashboards, authentication, and circulation tracking for STI Balagtas's ~300 students, in under one month.

Arsenia Apartment System

2024

Frontend Developer | 4-Person Team

ASP.NET MVC, C#

- Our 4-person team needed a tenant management system for property owners; as frontend developer, I built the views and connected them to backend operations for adding, viewing, and editing tenant records.

SKILLS

Languages: JavaScript, TypeScript, Python, PHP, Java, C#, Kotlin, Dart, GDScript, HTML, CSS

Frameworks & Libraries: React, Next.js, Flutter, Node.js, Express, Laravel, Livewire, Alpine.js, ASP.NET, REST APIs, Socket.IO, Redux, Tailwind CSS

Databases, Game & AR Platforms: PostgreSQL, MySQL, MongoDB, Firebase, Unity, Vuforia, Godot, Blender 3D

Tools & Cloud: Git, GitHub, Vercel, Firebase Hosting, VS Code, Figma, Postman, Android Studio

CERTIFICATIONS

13th TOPCIT Certificate (Nov 2025) · Azure AI Fundamentals, Microsoft (2026) · System Administration, STI Balagtas (Dec 2023) · Java Fundamentals I & II, Oracle Academy (2023)
